THE LIFE CHOICE PROJECT

EMPOWERING CENTERS TO BE MEDICAL, EMPOWERING MOTHERS TO CHOOSE LIFE
THOMAS GLESSNER - PRESIDENT AND FOUNDER

Since 1998, NIFLA has worked with Pregnancy Centers to convert their operations into medical facilities which operate under the license and supervision of a medical doctor. As such, they can legally provide crucial medical services to their abortion-minded patients. Primary among such services are ultrasound confirmation of pregnancy, which allows mothers to see their unborn children via the ultrasound screen. Of NIFLA's current 1,640 members over 1,400 operate as medical facilities, providing ultrasound and other medical services, such as STI testing and treatment, and Abortion Pill Reversal (APR).

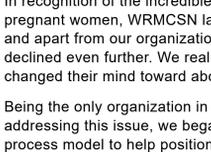

NIFLA has been committed to providing the necessary resources for pro-life pregnancy centers to legally convert to medical facility status. In so doing, pregnancy medical facilities are able to use the medical technology of ultrasound to confirm pregnancy for mothers considering abortion. The results of such a service are powerful - NIFLA statistics indicate that approximately 80% of mothers who are able to see their unborn children via ultrasound will choose life for their child.

Post-Dobbs America must see continued growth and development of the pregnancy medical facility movement for our vision of an abortion-free America to become a reality. Churches in every community must rise and take a stand for life by supporting pro-life ministries and providing the necessary resources for them to grow and expand. These churches must also provide the spiritual component necessary for their community to value and cherish all human life as precious and made in the image of God.

An abortion-free America is achieved community-by-community, just as in Nehemiah's day, each working to create a culture of life and build its section of the wall of protection for the unborn, their mothers, and the family unit.

Thank you for joining NIFLA in pursuing this vision for our nation. Your help is crucial for this endeavor and we are all grateful for your continued support.

Through The Life Choice Project (TLC), NIFLA provides all the resources for a pregnancy resource center to convert its operations into a licensed medical facility. Training of nurses to provide limited ultrasound, provision of medical policies & procedures, training of board members, and ongoing legal counsel are all provided through TLC to ensure that the conversion to medical facility status is legally correct.

MEET OUR MEMBERS

WOMEN'S RESOURCE MEDICAL CENTERS OF SOUTHERN NEVADA

"Women's Resource Medical Centers of Southern Nevada (WRMCSN) has been serving our community for 37 years. We opened our doors in 1985 as the Las Vegas Crisis Pregnancy Center, and although we were saving thousands of lives, by the end of the 1990's we were realizing that there were gaps in our ability to meet the incredible challenges that our clients were facing. The mindset toward abortion was changing

because of the introduction of ultrasound technology and women were becoming more aware that their pregnancy was not just a blob of tissue. Women who had past abortions were coming to terms with newly surfaced guilt and shame. So the passion from those who have experienced God's healing from a past abortion was energized toward rescuing others from making the same choices by offering peer counseling and post-abortion counseling services.

In 1999, we partnered with NIFLA and their TLC program who helped us reinvent our service model to become more relevant to the needs of women coming in our doors. Through the guidance of NIFLA, we became a medical center and began offering ultrasound services. We quickly began to experience a surge of clients seeking out our assistance and we grew our capacity to meet the demand by adding an additional ultrasound room and eventually a mobile ultrasound unit.

In recognition of the incredible lack of programs in our community for uninsured and under-insured pregnant women, WRMCSN launched our prenatal care program in September of 2017. Since that time and apart from our organization, the access in our community to prenatal care for these women has declined even further. We realized that women who were originally planning to carry their baby to term, changed their mind toward abortion once they realized that they truly had no support options for care.

Being the only organization in our entire state that was addressing this issue, we began to explore a more efficient process model to help position us to receive more patients into our care. Our new model of patient-centered prenatal and parenting care includes patient assessment, parent education, and social support maximizing women's potential for self-empowerment, growth and lifestyle changes, all of which result in improved perinatal and infant outcomes. As a faith-based organization, WRMCSN is positioned to include spiritual support and growth as well, thus elevating the model toward a holistic approach for our patients.

We are now exploring further growth opportunities to franchise our clinic and care model nationwide. We are extremely grateful for NIFLA, their TLC program, and our partnership to bring us to where we are as a medical clinic. We are looking forward to future collaboration with NIFLA as God imparts His vision for our industry of pregnancy care clinics and centers."

"IT IS AMAZING TO SEE THAT OVER 48,000 LIVES HAVE BEEN SAVED SINCE WE BECAME A MEDICAL CLINIC!"

"Not long ago, I was speaking with the director of another PMC about our respective paths for the process of becoming medical clinics. Our clinic had worked with NIFLA; my friend had chosen another route and regretted it. As I heard her experience, it really hit me how much NIFLA and Anne, our consultant, had invested in us. Their depth of experience in walking centers through the process was invaluable. Their knowledge and advice come from years of "boots on the ground" experience with hundreds, maybe thousands of PRCs. The consultations were personal. They came to our center to meet with our Board for training, there were weekly phone calls from Anne that were full of encouragement, and she was always available when I had a question or just needed to vent some frustration. Plus, the manuals and resources are thorough and easy to use.

Above everything else they did for us, when the process to become medical took longer than we anticipated and what our contract covered, they stayed with us at no extra cost. They just wanted us to succeed."

Executive directors often feel like Moses must have felt - *no, Lord, you couldn't mean me do this!* But God equips the called; I've seen it time and time again. Through hard work and crossing all the t's and dotting all the i's in the TLC process, the reward happens when that ultrasound machine is turned on to perform the first scan. It opens a window to the womb displaying incredible pictures of a sweet baby for a mom for the first time. Watching her bond with her baby as her heart softens and she chooses life for them is what it's all about."

ANGIE THOMAS - LEGAL COUNSEL

"The Life Choice Project is one of my favorite things we do at NIFLA! We walk with centers from the beginning stages of their vision from the Lord all the way through the medical conversion process. We get to witness the people and resources come together to do something beautiful in a community. Using our legal and medical experience, we walk through the process step by step, providing encouragement all along the way.

Every TLC project is different, but the end results are the same: lives saved! The beauty of this project is that we meet you right where you are in the process and help you to provide excellent, life-affirming medical services. Medical directors truly appreciate that the center is working with a legal and medical consultant. It provides an exceptional level of trust. **In addition, every Executive Director that I have worked with has said they simply could not imagine trying to do this conversion without the help of NIFLA! "**

"EVERY TLC PROJECT IS DIFFERENT, BUT THE END RESULTS ARE THE SAME: LIVES SAVED!"

EXECUTIVE DIRECTORS OFTEN FEEL LIKE MOSES MUST HAVE FELT - NO, LORD, YOU COULDN'T MEAN ME DO THIS! BUT GOD EQUIPS THE CALLED; I'VE SEEN IT TIME AND TIME AGAIN. THROUGH HARD WORK AND CROSSING ALL THE T'S AND DOTTING ALL THE I'S IN THE TLC PROCESS, THE REWARD HAPPENS WHEN THAT ULTRASOUND MACHINE IS TURNED ON TO PERFORM THE FIRST SCAN. IT OPENS A WINDOW TO THE WOMB DISPLAYING INCREDIBLE PICTURES OF A SWEET BABY FOR A MOM FOR THE FIRST TIME. WATCHING HER BOND WITH HER BABY AS HER HEART SOFTENS AND SHE CHOOSES LIFE FOR THEM IS WHAT IT'S ALL ABOUT."

MEET OUR CONSULTANTS

ANNE O'CONNOR - VP OF LEGAL AFFAIRS

"I am always in awe to see how God works to help centers convert to medical through the TLC process. So many times He provides some of the key elements even before the center itself catches the vision, as if He is pushing them along to do it. I had one center where the doctor came to their banquet and called the next day saying he felt called to be their medical director. Often, a donor offering to purchase an ultrasound machine is the catalyst. God always provides in His way.

Every TLC project is different, but the end results are the same: lives saved! The beauty of this project is that we meet you right where you are in the process and help you to provide excellent, life-affirming medical services. Medical directors truly appreciate that the center is working with a legal and medical consultant. It provides an exceptional level of trust. **In addition, every Executive Director that I have worked with has said they simply could not imagine trying to do this conversion without the help of NIFLA! "**

"EVERY TLC PROJECT IS DIFFERENT, BUT THE END RESULTS ARE THE SAME: LIVES SAVED!"

MEET OUR PARTNER

FOCUS ON THE FAMILY
ROBYN CHAMBERS,
EXECUTIVE DIRECTOR, ADVOCACY FOR CHILDREN

"Focus on the Family's Option Ultrasound Program has partnered with NIFLA for more than 18 years and it is an honor to support pregnancy help organizations with the funds necessary to become a pregnancy medical facility through The Life Choice Project. In this post-Roe era we know our work is not completed and we look forward to serving alongside NIFLA for many years to come."

"Back in 2019 our center took a bold step out in faith with the decision to go medical. One of the first steps in that process was signing on with The Life Choice Project. NIFLA held our hand and walked us through the entire process from start to finish. Tom, Anne and Audrey were so patient with us and answered every question we had, which were many as this was something so unfamiliar to all of us. The Life Choice Project equipped our staff and board with everything we needed from policies and procedures to branding, marketing, and training for myself, the board, and our nurses. We all sleep well at night knowing our clinic is built on the solid foundation of Christ first and NIFLA second. Our numbers immediately tripled after opening our doors as a pregnancy medical clinic and the number of abortion-minded and abortion-vulnerable women coming in our door quadrupled. We are so thankful for NIFLA and all their help and continued support for our clinic. I am even more blessed on a personal level to call our consultant, Anne, forever friend.

"We are a medical pregnancy clinic! NIFLA was instrumental in helping us achieve our goal of being "ultrasound-able." Working with NIFLA's consultants through the process was more than helpful. Anne and Katherine led our conversion team through a lengthy and challenging process, providing assured and confident assistance. Monthly check-in calls and in-between contacts as needed, ensured we were on track and accomplishing our short-term goals in a timely manner to ultimately reach our medical launch. It was a pleasure to work with Katherine and Anne and I looked forward to the monthly check-ins. They were able to answer all my questions along the way with knowledge and flexibility. They worked with our center, staff, and situation as unique, not with a "cookie-cutter solution". The training tracks for directors and medical staff were very helpful, and Tom's board training was important in preparing our board of directors for leadership. I'm very grateful that we partnered with NIFLA to achieve our goal of being a medical clinic! Thanks to NIFLA for everything!"

"Once becoming medical, I not only witnessed the beauty of a client seeing her child on Ultrasound while she was in a crisis situation, but the bar of excellence was raised in every other area as well.

We were able to move forward knowing that because of NIFLA's guidance through the Life Choice Project, we had solid training and ongoing assistance if needed."
